PCS HP Profile Nipple

The PCS HP Profile Nipple is a selective landing nipple that allows for the location of flow control devices, such as blanking plugs, bottom hole memory gauges etc.

The nipple has a lock groove for internal locking of the lock mandrel. The polished seal area provides a surface for sealing of the proper flow control device designed specifically for this nipple profile.

Specifications		
Size	Seal Bore	Min. O.D.
1.71"	1.710"	2.560"
1.78"	1.781"	2.560"
2.12"	2.125"	2.560"
2.18"	2.188"	3.109"
2.56"	2.562"	3.687"
3.688"	2.688"	
3.810"	3.812"	
4.56"	4.562"
