## PCS Supreme II HP Landing Nipple

The Supreme II landing nipple is a high pressure, no-go style profile nipple used for installation of flow control systems in High Pressure Oil & Gas wells.

The PCS Supreme II Landing Nipple is rated for 10,000 PSI working pressure. API 14L-0012 and ISO 9001/Q91 with all traceable material certifications provided.

This system provides a safe reliable means of controlling down-hole production where extreme pressures exist.

This Nipple is available in 13 Cr and or 25 Cr with KS Bear Premium Connections
